

ANNUAL REPORT

Mutual investment fund

PREVOIR PERSPECTIVES

Financial year from 01/05/2021 to 30/04/2022

- Management comments
- Statutory auditor's report on the annual accounts

Legal form: Mutual Investment Fund (Fonds Communs de Placement - FCP)

Management objective

The UCITS' management objective is to seek to outperform the CAC ALL TRADABLE index over the recommended investment period.

The closing price of the CAC ALL TRADABLE index is used, expressed in Euros, with dividends reinvested.

Investment strategy

To achieve the management objective, the fund implements an active management policy based, on the one hand,

- on fundamental research (growth in earnings, financial structure, quality of managers, etc.) allowing the selection of securities with appreciation potential,
- on technical analysis which optimises management by detecting the short-term signals of the market, whether during purchasing or selling. Technical analysis is defined as the graphical study of changes over time in prices and volumes of financial assets.

The strategy is to invest mainly in shares of small and mid cap companies of the Eurozone not belonging to major market indices.

The UCITS commits to complying with the following net asset exposures:

- from 60% to 110% maximum on equity markets of all business segments and in all capitalisation sizes, including:
 - from 60% to 110% maximum on equity markets of eurozone countries,
 - from 50% to 110% on shares of small and mid cap companies not belonging to major market indices.
 - from 0% to 10% on Open Market shares,
 - from 0% to 10% on equity markets of non-Eurozone countries (OECD or emerging countries).
 - from 0% to 40% in issuer's sovereign rate instruments of the public or private sector, of the Eurozone, of minimal rating of A3 for the short-term or BBB- for the long-term debt according to Standard & Poor's scale or by default, an equivalent rating.
 - from 0% to 10% on foreign exchange risk on non-euro currencies. The accumulation of exposures does not exceed 110% of assets.

PEA-eligible securities consistently represent at least 75% of the assets of the UCITS. The UCITS invests in:

- Shares, debt securities and money market instruments.
- up to 10% of its net assets in UCITS under French or foreign law, in FIA under French law, satisfying the conditions of Article R.214-13 of the Monetary and Financial Code.

It can also intervene on:

- futures or optional financial contracts and securities incorporating derivatives, for both hedging and exposure to equity, interest and exchange rate risk purposes.
- deposits, cash borrowings, purchases and temporary sale of securities.

FCP PREVOIR PERSPECTIVES

Balance sheet of the UCITS:

During the period from 30/04/2021 to 29/04/2022, the number of shares comprising the assets of the Fund decreased from 163,361 shares to 161,961 shares for the C share, and from 12,095 shares to 10,147 shares for the I share.

The net asset value of the C share fell from €366.27 to €347.48, marking a decrease of 5.1% (the decrease for the I share was 3.7%), compared to an increase of 4.8% for the CAC All Tradable (dividends included).

Economic environment:

Still heavily affected by the Covid-19 epidemic, the 2021/2022 financial year has seen a very strong economic upturn, but also, as typified by the Ever Given container ship blocked in the middle of the Suez Canal for a week, a widespread congestion of supply chains around the world. The massive support measures put in place to sustain developed economies played their part, further exacerbating tensions in supply chains leading to a year-round historical upswing in inflation.

Initially considered temporary due to the bottlenecks, the surge in inflation has taken hold in the course of the year. The consumer price index in Europe rose above 3% year-on-year at the end of summer 2021, and exceeded 7% by March 2022! Against this backdrop of rising prices, the GDP of the Eurozone remained on a solid footing (close to 5% at the end of March 2022). It is becoming increasingly clear, however, that policies to sustain economies will not be able to remain as accommodating in the long term. In mid-December, the US Federal Reserve announced an acceleration of the rate of decline in its monthly purchases and, without waiting to be asked, the English made the first move on 16 December 2021, with the BoE (Bank of England) increasing its key rate by 15bp to 0.25%.

The ECB, in an economic context somewhat different from that of the United States, in particular on the employment front, wanted to be more cautious, but could not escape normalisation either. From mid-December onwards, long rates are on the rise, with the 10-year US rate reaching 2.34% at the end of March 2022 against 1.74% a year earlier. The French 10 years went from -0.02% to 0.98% between mid-December and the end of March 2022, and the German 10 years from -0.38% to 0.55% over the same period.

The surge in global inflation amplified by the war in Europe, the lockdowns in China and the rapid monetary tightening initiated by major central banks are hindering visibility on growth and financial markets. Against this backdrop, global stock markets have experienced mixed developments. Driven by very good quality results, they continued their recovery beyond the first days of 2022. However, the upward trend in rates, which began in December, as well as the accumulation of doubts about the sustainability of growth, put a halt to the rise in the end.

In general, the indices ended the period in the green, but continued on a downward trend: the Nasdaq posted an increase of 7.4%, the SBF 250 NT, the fund's benchmark index, an increase of 4.8%, and the SDAX, closer to the composition of the portfolio, a decrease of -14.7% over the reference period.

Expectations for 2022/2023:

In January 2022, IMF economists were predicting global growth of 4.4% for 2022, but since then the forecast has been constantly revised downwards, and is now at 3.6%. Almost all countries, with the exception of the major oil producers, which are benefiting from rising prices, are undergoing downward revisions. For its part, the European Commission is still counting on a 2.7% increase in gross domestic product in 2022 and 2.3% in 2023 within the European Union. In February it was forecasting a growth of 4% in 2022 and 2.8% the following year!

The war in Ukraine has also weighed on estimates, with the IMF anticipating a collapse in Ukrainian GDP of 35% and a recession in Russia (-8.5%). Even if the latter only represents a tiny part of world GDP (less than 2%), it weighs very heavily on certain sectors such as wheat, barley or sunflower (25%, 15% and 40% of world volume respectively) and on fossil fuels, petrol and gas in particular (10% and 20% of global trade in these products respectively).

Eastern European neighbours (Poland, Hungary, Moldova, Hungary, etc.) have also been weakened by the massive influx of refugees. For Germany, which had significant economic ties with Russia, the sanctions have had severe consequences, with growth expected to be 1.6 % in 2022 and 2.4% in 2023. France, whose activity depends less on its trade with the outside world and more on domestic consumption, is doing better in 2022 (3.1% estimated), but not beyond that (1.8% expected in 2023).

There is also concern about China, which is showing a clear slowdown. The return of the pandemic, with Omicron, paralysed activity for several weeks in dozens of major cities, including Shanghai and the Shenzhen region, which remain the economic engines of the middle empire. This year's growth has been revised down to 4.4%, 1.2 percentage points lower than last October.

However, these growth revisions still need to be taken with caution, as visibility is low and there are a number of important moving and contradictory factors at play. On the one hand, inflation boosts real growth with strong price effects, but this inflation is such (the IMF has revised its forecasts upwards: 5.7% this year in the developed countries and 8.7% for the emerging world) that central banks are being forced to quickly withdraw the aid programmes put in place post-Covid-19.

Although the rise in prices is focused on energy, the war has also aggravated the rise in prices of agricultural raw materials, which had already been happening for several months as a result of the post-pandemic recovery, and poor weather conditions, which have reduced harvests in several countries. The soaring prices of cereals (wheat, maize, barley, etc.) and staple foods are having a major impact in poor countries, which could lead to an explosion of social unrest.

As a consequence, the economic environment for equity markets is expected to remain unsettled for a few months. Fears of a stronger-than-expected slowdown in the global economy could dampen or even stem the rise in interest rates and inflation. As markets have already corrected significantly since the beginning of January 2022, a lull on the inflation front would be positive. This would be particularly true for small growth and quality stocks, which are typically exposed to the growing niche markets that form the core of the fund's portfolio. A normalised but still relatively low rate environment leaves few alternatives for investors, who should resume directing investment flows to the stock market to maintain their purchasing power over time.

Management policy:

The fund pursues an active stock picking policy of eurozone small- and mid-cap shares, accompanied by the use of technical analysis, and above all, personal contact with the management of the companies in which the fund is invested. Focusing on our beliefs and our independent management enables us to adapt to any market condition, independently of stock market indices and other conflicts of interest.

Regulatory Information:

Information on ESG criteria

The environmental, social and governance criteria (ESG criteria) are among the elements studied by Société de Gestion Prévoir in its stocks' analysis and selection process.

Nevertheless, not having formalised indicators based on the ESG criteria, the UCITS managed by Société de Gestion Prévoir do not rely on these criteria for their management.

This UCITS has not promoted any sustainable investment: neither sustainable investment objective, nor environmental, social or governance characteristics.

Its management strategy is exclusively linked to its financial performance measured by comparison with its benchmark, a market indicator.

The investments underlying this financial product do not take into account the European Union's criteria for environmentally sustainable economic activities.

More comprehensive information on the Position of the Management Company relating to the implementation of ESG principles is available on the 'Regulatory information' page of the website www.sgprevoir.fr.

Information related to the financial instruments and collective investments of the group, or for which the group has a special interest

None

Report on intermediation fees: Investment decision support services (acronym 'SADIE' in French) / Commission Sharing Agreements (CSA) or Shared Brokerage Commission Agreement (SBCA)

None

Efficient portfolio management techniques (securities lending/borrowing, repo, etc.) - Transparency of securities financing transactions (SFTR)

The UCITS did not use efficient portfolio management techniques during the year.

The fund did not engage in securities financing transactions subject to Securities Financing Transactions Regulation (SFTR), namely repo transaction, lending/borrowing of commodity securities, buy-resale or sell-buy transaction, loan transaction with margin call, and Total Return Swap (TRS) contract.

Financial derivative instruments

None

Management of financial guarantees of transactions on over-the-counter derivative financial instruments and efficient portfolio management techniques

None

Swing pricing - Adjustable fees

Not applicable

In accordance with the management strategy contained in the prospectus, over 75% of the fund has been invested in PEA eligible securities.

Transparency of Securities Financing Transactions (SFTs)

During the year, the fund did not engage in securities financing transactions subject to Securities Financing Transactions Regulation (SFTR), namely repo transaction, lending/borrowing of commodity securities, buy-resale or sell-buy transaction, loan transaction with margin call, and Total Return Swap (TRS) contract.

ACCOUNTING REPORT AS AT 30/04/2022

PREVOIR PERSPECTIVES

LEGAL INFORMATION

Past performance is no guarantee of future performance.

Transaction fees and intermediation costs

The report on intermediation costs provided for in Article 314-82 of the Règlement Général de l'Autorité des Marchés Financiers (General Regulation of the Financial Markets Authority) is available on the website of the management company and/or at its registered office.

Manager's policy on voting rights

In accordance with Articles 314-100 to 314-102 of the abovementioned Regulations, information on the voting policy and the report of the same are available on the website of the management company and/or at its registered office.

Procedure for the selection and evaluation of intermediaries and counterparties

More details on these two topics are available by consulting our policy for the selection of intermediaries on our website at the following address: <http://www.sgprevoir.fr/informations-legales/>

Information on the methods of calculating overall risk

The commitment calculation method is used to calculate overall risk on financial contracts.

Information on remuneration

Financial Year 2022

Société de Gestion Prévoir has implemented a Company Staff Remuneration Policy in accordance with European Directive 2014/91/EU (known as the "CITS 5 Directive"), and the doctrine of the supervisory authorities.

Adapted to the size and activities of the Company, this Policy complies with the following general principles:

- Alignment with the investment firm's strategy, its objectives, values and long-term interests,
- Primacy of the interest of customers,
- Risk mitigation,
- Prevention of conflicts of interest,
- Consideration of quantitative and qualitative criteria.

Specific provisions of this Policy apply to certain identified categories of persons, especially senior management, the management team, and the control functions.

Their variable remuneration is determined by combining the assessment of the performance of the employees concerned, the business unit to which they belong and the overall results of SGP. This individual performance evaluation takes account of both financial and non-financial criteria, as well as respect for the rules of sound risk management.

Beyond a certain threshold, their variable remuneration is subject to restrictions: deferred payment over several years, possibility of retention aligned with the long-term interests of the FCP and the Company, payment of a part in financial instruments, etc.

The Company has set up a Remuneration Committee to ensure the proper application of this policy.

In the 2021 financial year, the total amount of remuneration (including deferred and non-deferred fixed and variable remuneration) paid by the management company to all of its employees (i.e. 11 beneficiaries as of 31 December 2021) amounted to €1,612,835. Given the size of the management company's workforce, and to maintain the confidentiality of individual remuneration, no other data is disclosed. In addition, no 'carried interest' was recorded for the year. No remuneration has been paid by the FCP directly to the members of the management company's staff.

Opinion

In accordance with the assignment entrusted to us by the management company, we have audited the annual accounts of the UCITS constituted in the form of a mutual fund known as PREVOIR PERSPECTIVES for the financial year ended 29 April 2022, as attached to this report.

We hereby certify that the annual accounts, in accordance with French accounting rules and principles, give a true and fair view of the results of operations for the year under review, and the financial position, assets and liabilities of the UCITS constituted in the form of a mutual investment fund at the end of that financial year.

Basis of opinion

Auditing framework

We conducted our audit in accordance with professional standards applicable in France. We believe that the evidence we have collected is sufficient and appropriate to provide a basis for our opinion. The responsibilities incumbent upon us under these standards are indicated in the section '*Statutory auditor's responsibilities regarding the audit of the annual accounts*' of this report.

Independence

We conducted our audit assignment in line with the rules of independence provided for by the Commercial Code and by the Code of Ethics for Statutory Auditors, for the period from 30/04/2021 to the date of issue of our report.

PREVOIR PERSPECTIVES

Basis for our assessments

The global crisis linked to the COVID-19 pandemic has created special conditions for the preparation and auditing of the accounts for this financial year. Indeed, this crisis and the exceptional measures taken within the framework of the state of health emergency induce multiple consequences for Collective Investment Organisations, their investments and the valuation of the corresponding assets and liabilities. Some of these measures, such as travel restrictions and remote working, also had an impact on the operational management of Collective Investment Organisations and on the procedures for carrying out audits.

It is in this complex and evolving context that, in application of the provisions of Articles L.823-9 and R.823-7 of the Commercial Code relating to the basis for our assessments, we bring to your attention that the assessments which, according to our professional judgment were the most important for the audit of the annual accounts for the year, concerned the appropriateness of the accounting principles applied, as well as the reasonableness of the significant estimates made and the overall presentation of the accounts.

These assessments were made as part of our audit of the annual accounts taken as a whole, and have therefore contributed to the opinion we expressed in the first part of this report. We have not provided a separate opinion on specific items in the annual accounts.

Specific audits

We have also carried out the specific verifications required by the relevant legal and regulatory provisions, in accordance with professional standards applicable in France.

We have no matters to report as to the fair presentation and the consistency of the annual accounts with the information given in the management report prepared by the management company.

PREVOIR PERSPECTIVES

Responsibilities of the management company with respect to the annual accounts

It is the responsibility of the management company to prepare annual accounts presenting a true and fair view in accordance with French accounting rules and principles, and to set up the internal controls it deems necessary for the preparation of annual accounts that do not include any material misstatements, whether due to fraud or error.

When preparing the annual accounts, it is the management company's responsibility to assess the Fund's ability to continue as a going concern, to present in said annual accounts, where applicable, the necessary information relating to the continuity of operations, and to apply the going concern accounting policy unless it intends to wind up the Fund or to cease activities.

The annual accounts have been prepared by the management company.

Statutory auditor's responsibilities regarding the audit of the annual accounts

Audit objective and approach

Our role is to issue a report on the annual accounts. Our objective is to obtain reasonable assurance that the annual accounts taken as a whole are free of material misstatement. Reasonable assurance corresponds to a high level of assurance, although this does not guarantee that an audit performed in accordance with the standards of professional practice can systematically detect any material misstatement. Misstatements may result from fraud or errors, and are considered material when it can reasonably be expected that they could, taken individually or in combination, influence the economic decisions that users of the annual accounts make based on them.

As stated in Article L. 823-10-1 of the Commercial Code, our audit assignment does not include guaranteeing the viability or the quality of the management of the Fund.

Within the context of an audit, conducted in accordance with the professional standards applicable in France, the statutory auditor uses its professional judgement throughout the full duration of this audit. Furthermore:

- the auditor identifies and assesses the risks that the annual accounts may contain material misstatements, whether due to fraud or error, defines and implements audit procedures to address these risks, and collects information that is considered to be sufficient and appropriate for the basis of an opinion. The risk of not detecting a material misstatement resulting from fraud is higher than that of a material misstatement resulting from an error, as the fraud may involve collusion, falsification, voluntary omissions, misrepresentation, or circumvention of internal control;

PREVOIR PERSPECTIVES

- the auditor evaluates the pertinent internal controls in order to define appropriate audit procedures for the circumstances, and not to express an opinion on the effectiveness of these internal controls;
- the auditor evaluates the appropriateness of the accounting policies used and estimates the reasonableness of the accounting estimates made by the management company, as well as information in this respect provided in the annual accounts;
- the auditor assesses the appropriateness of the management company's application of the going concern accounting principle and, depending on the information obtained, whether or not there is significant uncertainty relating to events or circumstances that may question the Fund's ability to continue as a going concern. This assessment is based on information gathered up to its reporting date, although it is recalled that subsequent circumstances or events may affect its viability as a going concern. Should the auditor conclude that there is significant uncertainty, this information provided in the annual accounts must be brought to the attention of the readers of its report or, if this information is not provided or is insufficient, the auditor may qualify the audit report or refuse to certify the annual accounts;
- the auditor assesses the overall presentation of the annual accounts, and evaluates whether the annual accounts reflect the underlying transactions and events in a manner that provides a true and fair representation thereof.

ACCOUNTING POLICIES

The annual financial statements are presented in the format laid down by ANC (French accounting standards authority) Regulation 2014-01, as amended. COVID-19 and impact on the annual accounts:

These annual accounts have been prepared by the management company on the basis of the information available in the changing context of the crisis linked to COVID-19.

Accounting items are presented in Euros, the accounting currency of the UCI.

Revenue accounting

Financial accounts are recorded for their amount, plus, if necessary, accrued interest attached to them.

The UCI records its income using the coupon method.

Accounting of cash inflows and outflows in the portfolio

The accounting of securities inflows and outflows in the UCI's portfolio is made excluding costs.

Allocation of distributable sums

C Share:

For revenues: total capitalisation

For capital gains or losses: total capitalisation

I Share:

For revenues: total capitalisation

For capital gains or losses: total capitalisation

Management and operating fees

Management fees are provided for in the information note or full prospectus of the UCI.

Fixed management fees (maximum rate)

		Fixed management fees	Base
C	FR0007071931	2.99% incl tax maximum	Net assets
I	FR0011791557	1.5 % incl tax maximum	Net assets

Indirect management fees (on UCIs)

		Indirect management fees
C	FR0007071931	None
I	FR0011791557	None

Out-performance fee FR0007071931**C Share**

None

FR0011791557 I Share

None

Retrocessions

The accounting policy for retrocessions of management fees on target UCIs held is decided upon by the management company.

These retrocessions are recorded minus the management fees. Expenses actually incurred by the fund are shown in the table 'MANAGEMENT FEES SUPPORTED BY THE UCI'. Management fees are calculated on the average net asset at each net asset value and cover financial, administrative, valuation costs, custodian's cost, auditors' fees, etc. They do not include transaction fees.

Transaction fees

Brokerage fees, commissions and fees related to the sale of securities included in the collective portfolio, as well as the purchase of securities through income from either the sale or redemption of securities or income from assets included in the UCI, are deducted from the said assets and from liquid assets.

Transfer fees	Distribution key (in %)

None			

Valuation method

At each valuation, the assets of UCITS, FIA are valued according to the following principles:

Shares and similar securities listed (French and foreign securities):

Valuation is at the market price.

The share price used depends on the security's quoted market:

European stock markets: Last market price of the day.

Asian stock markets: Last market price of the day.

Australian stock markets: Last market price of the day.

North American stock markets: Last market price of the day.

South American stock markets: Last market price of the day.

If a security is not listed, the last market price of the previous day is used.

Bonds and similar debt securities (French and foreign securities) and EMTN:

Valuation is at the market price.

The share price used depends on the security's quoted market:

European stock markets: Last market price of the day.

Asian stock markets: Last market price of the day.

Australian stock markets: Last market price of the day.

North American stock markets: Last market price of the day.

South American stock markets: Last market price of the day.

If a security is not listed, the last market price of the previous day is used.

In the case of an unrealistic quotation, the manager must make an estimate more in line with the actual market parameters. Depending on the sources available, valuation may be carried out using different methods such as:

- the quotation of a contributor,
- an average of quotations from several contributors,
- a price calculated using an actuarial method from a (credit or other) spread and a yield curve,
- etc.

Securities of UCITS, FIA or investment funds in the portfolio:

Valuation on the basis of the last known net asset value.

Shares of Securitisation bodies:

Valuation at the last stock market price of the day for securitisation bodies listed on European markets.

Temporary purchase of securities:

- Sale of repurchase agreements: Contractual valuation. No repurchase agreements for more than 3 months.
- Repurchase agreement: Contractual valuation, as the redemption of securities by the seller is envisaged with sufficient certainty.
- • Securities borrowings: Valuation of borrowed securities and repayment debt corresponding to the market value of the securities concerned.

Temporary purchase and sale of securities:

- Securities sold under repurchase agreements: Securities sold under repurchase agreements are valued at the market price, debts representing securities sold under repurchase agreements are maintained at the value fixed in the contract.
- Securities lending: Valuation of securities lent at the stock market price of the underlying value. The securities are recovered by UCITS, FIA at the end of the loan agreement.

Unlisted securities:

Valuation using methods based on asset value and yield, taking into account the prices set during recent significant transactions.

Negotiable debt securities (Titres de Créances Négociables - TCNs):

- TCNs which, at the time of purchase, have a residual maturity of less than three months, are valued on a straight-line basis.
- TCNs acquired with a residual maturity of more than three months are valued:
 - at their market value for up to 3 months and one day before maturity.
 - the difference between the market value observed 3 months and 1 day before maturity and the redemption value is linearised over the last 3 months.
 - exceptions: Treasury bonds (BTFs and BTANs) are valued at market prices until maturity.

Market value retained:

- BTF / BTAN treasury bonds:

Actuarial yield rate or price of the day published by Banque de France.

- Other negotiable debt securities (TCNs):

a) Securities with a lifespan of between 3 months and 1 year:

- if the TCN is traded in large volumes: application of an actuarial method, the rate of return used will be that observed daily on the market.
- other TCNs: application of a proportional method, the rate of return used will be the EURIBOR rate of equivalent duration, possibly adjusted by a margin representative of the intrinsic characteristics of the issuer.

b) Securities with a lifespan of more than one year:

Application of the actuarial method.

- if the TCN is traded in large volumes, the rate of return used is that observed daily on the market.
- other TCNs: the rate of return used is the BTAN rate of equivalent maturity, possibly adjusted by a margin representative of the intrinsic characteristics of the issuer.

Futures contracts:

The market prices used for the valuation of futures contracts are in line with those of underlying securities. They vary according to the stock market on which the contract is listed:

- Futures contracts listed on European stock markets: Last price of the day or settlement price of the day.

- Futures contracts listed on North American stock markets: Last price of the day or settlement price of the day.

Options:

Market prices used follow the same principle as those governing contracts or securities:

:

- Options listed on European stock markets: Last price of the day or settlement price of the day.

- Options listed on North American stock markets: Last price of the day or settlement price of the day.

Swap transactions:

- Swaps with a lifespan of less than 3 months are valued on a straight-line basis.

- Swaps with a lifespan of more than 3 months are valued at the market price.

- Index swaps are valued at the price given by the counterparty; the management company independently controls this valuation.

- If the swap contract is backed by clearly identified securities (quality and duration), these two elements are valued globally.

Forward exchange contracts

These are hedging transactions for securities in a portfolio denominated in a currency other than that of the accounts of UCITS, of the FIA by way a currency loan in the same currency and for the same amount. Forward currency transactions are valued according to the currency lender/borrower yield curve.

Valuation method of off-balance sheet commitments

- Commitments on futures contracts are determined at the market value. This is equal to the valuation price multiplied by the number of contracts and nominal value. Commitments on over-the-counter swap contracts are presented at their nominal value or, in the absence of nominal value, for an equivalent amount.

- Commitments on conditional transactions are determined on the basis of the underlying equivalent of the option. This translation consists of multiplying the number of options by a delta. The delta results from a mathematical model (Black-Scholes type) whose parameters are: the price of the underlying equivalent, term to maturity, short-term interest rate, the option exercise price, and the volatility of the underlying equivalent. Off-balance sheet presentation corresponds to the economic meaning of the transaction and not that of the contract.

- Dividend swaps versus evolution of performance are shown at nominal value off-balance sheet.

- Back-to-back or non back-to-back swaps are recorded at nominal value off-balance sheet.

Description of guarantees received or given

Guarantee received:

None

Guarantee given:

As part of carrying out transactions on over-the-counter derivative financial instruments and the temporary purchase/sale of securities, the UCITS may receive financial assets that are considered as collateral, and are intended to reduce its exposure to counterparty risk.

The financial guarantees received will essentially be in cash for transactions on over-the-counter derivative financial instruments, and in cash and eligible government bonds for transactions for the temporary purchase/sale of securities.

- it is given in the form of cash or bonds issued or guaranteed by the OECD member states or by their local authorities or community, regional or global supranational institutions or bodies;

Any financial guarantee received will respect the following principles:

- Liquidity: Any financial guarantee in securities must be very liquid and can quickly be traded on a regulated market at a transparent price.

- - Transferability: Financial guarantees are transferable at any time.

- Valuation: The financial guarantees received are valued on a daily basis. A prudent haircut policy will be applied to securities that may exhibit significant volatility, or depending on the credit quality.

- Credit quality of issuers: Financial guarantees are of high quality credit.

- Guarantee investments received in cash: These are either invested in deposits with eligible entities or invested in high credit quality government bonds (rating which meets 'short-term monetary' UCITS/FIA criteria) or invested in 'short-term money' UCITS /FIAs, or used for repurchase transactions with a credit institution,

- Correlation: Guarantees are issued by an entity independent of the counterparty.

- Diversification: Counterparty risk in over-the-counter transactions may not exceed 10% of net assets when the counterparty is one of the credit institutions as defined in the regulations in force, or 5% of its assets in other cases.

Exposure to a given issuer does not exceed 20% of net assets.

- Conservation: Financial guarantees received are invested with the Custodian or by one of its agents or third parties under its control, or by any third party custodian subject to prudential supervision, and who has no link with the provider of the financial guarantees.

- Prohibition of re-use: Non-cash financial guarantees may not be sold, reinvested or used as collateral.
