

**Pre-contractual information template for financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and in the first subparagraph of Article 6 of Regulation (EU) 2020/852**

**Sustainable investment** refers to an investment in an economic activity that contributes to an environmental or social objective, provided that it does not cause significant harm to any of these objectives and that the companies benefiting from the investments apply good governance practices.

**The EU taxonomy** is a classification system established by Regulation (EU) 2020/852, which establishes a list of **environmentally sustainable economic activities**. This regulation does not draw up a list of socially sustainable economic activities. Sustainable investments with an environmental objective are not necessarily aligned with the taxonomy.

Name of the product: **PREVOIR GESTION ACTIONS**  
 Legal entity identifier: **9695001Q3IZ3Y6WS9560**

## Environmental and/or social characteristics

**Does this financial product have a sustainable investment objective?**

**Yes**

**No**

It will achieve a minimum of sustainable investments with an environmental objective: \_\_\_%

in economic activities that are considered environmentally sustainable under the EU taxonomy

in economic activities that are considered environmentally sustainable under the EU taxonomy

It will make a minimum of sustainable investments with a social objective: \_\_\_%

It promotes environmental and social (E/S) characteristics and, although its objective is not sustainable investment, it will contain a minimum proportion of \_\_\_% of sustainable investments

having an environmental objective in economic activities that are considered environmentally sustainable under the EU taxonomy

under the EU taxonomy with an environmental objective in economic activities that are not considered environmentally sustainable under the EU taxonomy

with a social objective

It promotes E/S characteristics, **but will not make sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

Investments are made by taking into account an ESG rating that is proprietary to the Management Company.

An assessment of the entire portfolio is carried out annually according to a proprietary ESG rating, and upstream for each investment.

**Sustainability indicators** assess the extent to which environmental or social characteristics promoted by the financial product are achieved.

This rating takes into account E (2 criteria), S (1 criterion) and G (1 criterion) criteria, which is used to establish an ESG rating for each security in the portfolio and for each security in its benchmark.

● **What are the sustainability indicators used to measure the achievement of each of the environmental or social characteristics promoted by the financial product?**

The sustainability indicators used are as follows:

- The portfolio's ESG rating
- The ESG rating of the EURO STOXX 300 index

● **What are the objectives of the sustainable investments that the financial product intends to partially achieve and how does sustainable investment contribute to these objectives?**

Not applicable. The fund's objective is not to make sustainable investments.

● **To what extent do the sustainable investments that the financial product intends to partially achieve not cause significant harm to an environmentally or socially sustainable investment objective?**

Not applicable. The fund's objective is not to make sustainable investments.

--- **How have the indicators regarding adverse impacts been taken into account?**

Not applicable.

--- **To what extent are sustainable investments in line with OECD guidelines for multinational companies and UN guidelines for companies and human rights?**

Not applicable.

The **main negative impacts** are the most significant negative impacts of investment decisions on sustainability factors related to environmental, social and personnel issues, respect for human rights and the fight against corruption and acts of corruption.

**Does this financial product take into account the main negative impacts on sustainability factors?**

Yes

The main negative impacts are partially taken into account at 2 levels:

1- Exclusion policy of the Management Company:

• Sector exclusions:

Société de Gestion Prévoir expects to exclude companies operating in the following sectors from its investment scope:

- The operation and production of Coal, if these activities exceed 25% of revenue;
- The production, use, storage, maintenance or financing of controversial weapons as defined in the Ottawa and Oslo conventions (cluster bombs and anti-personnel mines);

• Normative exclusions:

Société de Gestion Prévoir is careful not to invest in companies that do not respect the principles promoted by the main international standards, such as the United Nations Global Compact. Thus, the following companies are excluded:

**Good governance** practices relate to sound management structures, employee relations, staff remuneration and compliance with tax obligations.

- Serious violations of human rights, particularly in the area of war or conflict;
- Serious environmental damage;
- Violations of fundamental ethical standards or serious cases of corruption.

## 2- Proprietary ex-ante ESG analysis:

Carbon intensity measurements and GHG emissions.

### **What investment strategy does this financial product follow?**

An internal ESG rating is calculated by the Management Company's teams according to a proprietary evaluation scale.

The fund incorporates an ESG filter in its investment choices in order to identify and favour the best ESG profiles within its investment universe.

The fund aims to achieve a weighted average rating higher than the weighted average rating of its EURO STOXX 300 index.

The coverage rate of the portfolio by this internal ESG rating is above 90% for large caps and 75% for small and medium caps.

#### ● **What are the binding elements of the investment strategy used to select investments in order to achieve each of the environmental or social characteristics promoted by this financial product?**

1. A sectoral and normative exclusion policy (detailed in the Société de Gestion Prévoir's ESG Charter), which excludes:

- the mining and production of coal,
- the production or sale of controversial weapons,
- the violation of the principles promoted by the United Nations Global Compact

2. An internal ESG rating based on E, S and G criteria. The fund targets a weighted average ESG score above the weighted average score of the benchmark. The portfolio's coverage ratio is greater than 90% for large caps and 75% for small and mid caps. Particular attention is paid to monitoring controversies.

3. The fund's ESG integration methodology is reviewed annually.

#### ● **What is the minimum commitment rate to reduce the scope of planned investments prior to the application of this investment strategy?**

0%. No minimum commitment rate. However, an analysis of ESG criteria using a proprietary method is carried out before each investment.

#### ● **What is the policy used to assess the good governance practices of investee companies?**

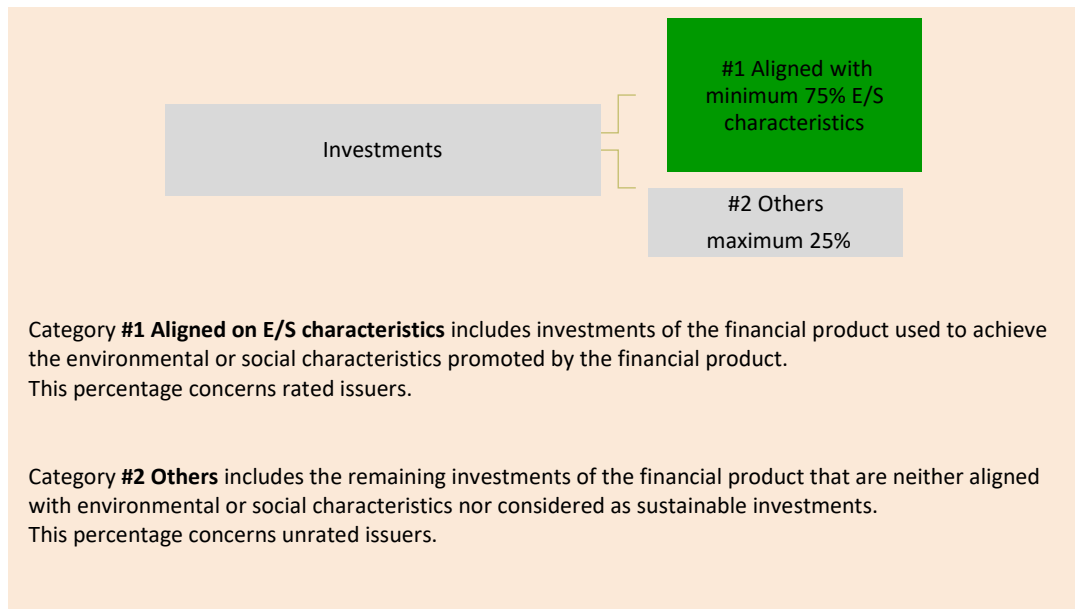

Société de Gestion Prévoir attaches great importance to governance. The governance structure, the separation of the role of chairman and the role of chief executive officer, the independence of the Board and respect for the rights of minority shareholders are subjects on which the management company's managers are vigilant.

The **investment strategy** guides investment decisions according to factors such as investment objectives and risk tolerance .

As part of the ex-ante analysis carried out prior to each investment, an assessment of the Board of Directors' independence rate is carried out.

## What is the planned asset allocation for this financial product?

Asset allocation describes the proportion of investments in specific assets.

Activities aligned with the taxonomy are expressed as a percentage of the:

- **revenue** to reflect the share of revenues from the green activities of investee companies;

- **investment expenses** (CapEx) to show the green investments made by investee companies, for example for a transition to a green economy;

- **operating expenses** (OpEx) to reflect the green operational activities of the investee companies.

### ● How does the use of derivatives meet the environmental or social characteristics promoted by the financial product?

Not applicable. The financial product does not use derivatives in the achievement of the environmental or social characteristics it promotes.

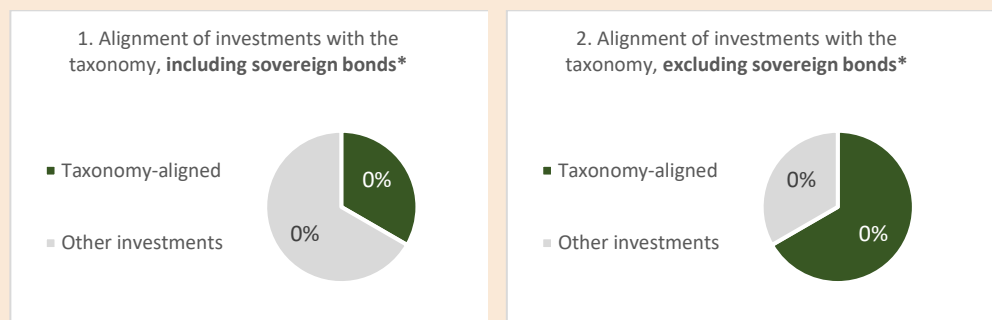

### To what extent are sustainable investments with an environmental objective aligned with the EU taxonomy?

Not applicable. (Chart below: Not applicable).

**Enabling activities** directly enable other activities to make a substantial contribution to the achievement of an environmental objective.

**Transitional activities** are activities for which there are not yet low-carbon alternatives and, among other things, whose levels of greenhouse gas emissions correspond to the best attainable performance.

The two charts below show in green the minimum percentage of investments aligned with the EU taxonomy. Given that there is no appropriate methodology for determining the alignment of sovereign bonds\* with the taxonomy, the first chart shows the alignment with the taxonomy with all investments of the financial product, including sovereign bonds, while the second graph represents the alignment with the taxonomy only with the investments of the financial product other than sovereign bonds.

\* For the purposes of these charts, sovereign "bonds" include all sovereign exposures.

● **What is the minimum proportion of investments in transitional and enabling activities?**

Not applicable.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU taxonomy?**

Not applicable.

**What is the minimum share of socially sustainable investments?**

The fund does not commit to a minimum proportion of socially sustainable investments.

The UCI is classified as article 8 within the meaning of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (the "Disclosure Regulation"). Environmental, social and governance (ESG) criteria help the Investment Manager reach investment decisions, though they are not a decisive factor in such decisions.

The symbol represents sustainable investments with an environmental objective that **do not take into account the criteria** applicable to environmentally sustainable economic activities under the EU taxonomy.

**What investments are included in the "#2 Others" category, what is their purpose and are there minimum environmental or social guarantees?**

The "#2 Others" category corresponds to:

1- securities for which the Management Company does not have the data necessary to establish the internal ESG rating.

This 25% rate is a maximum in accordance with the portfolio's target coverage rate by internal ESG rating of more than 90% for large caps and 75% for small and mid caps.

Exclusion filters (coal, controversial weapons, United Nations Global Compact) make it possible to verify minimum environmental or social guarantees.

2- the cash position of the fund. This position is structurally very limited. The fund is supposed to be fully invested at all time.

**Has a specific index been designated as a benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics it promotes?**

No

- ***How is the benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the index methodology permanently guaranteed?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can I find the method used to calculate the designated index?***

Not applicable.

**Benchmarks** are indices used to measure whether the financial product achieves the environmental or social characteristics it promotes.

**Where can I find more product-specific information online?**

Further information on the product can be found on Prévoir Management Company's website.
